

ERSKINE PARK HIGH SCHOOL
'Putting Plans into Action'

STAGE 1

STAGE 2

STAGE 3

Since last term at the SALSA excursion
the Erskine Park SALSA leaders have
actioned multiple events...

Stage 1:

The SALSA leaders decided to improve the healthy environment and quality of learning for students by implementing a device that will improve student wellbeing.

We have decided to install a water bottle refill station in our school. Before we purchased one we considered many factors to suit the purpose of 'the school action plan'.

These factors included:

- Accessibility for all students and staff
- Cost
- Placement
- Installation
- Filtered Water

Considering these factors we began researching for the appropriate water refill station, we came up with two options.

Wall mounted

Available in different colours

Different sizes available (shorter)

Optional filtered water

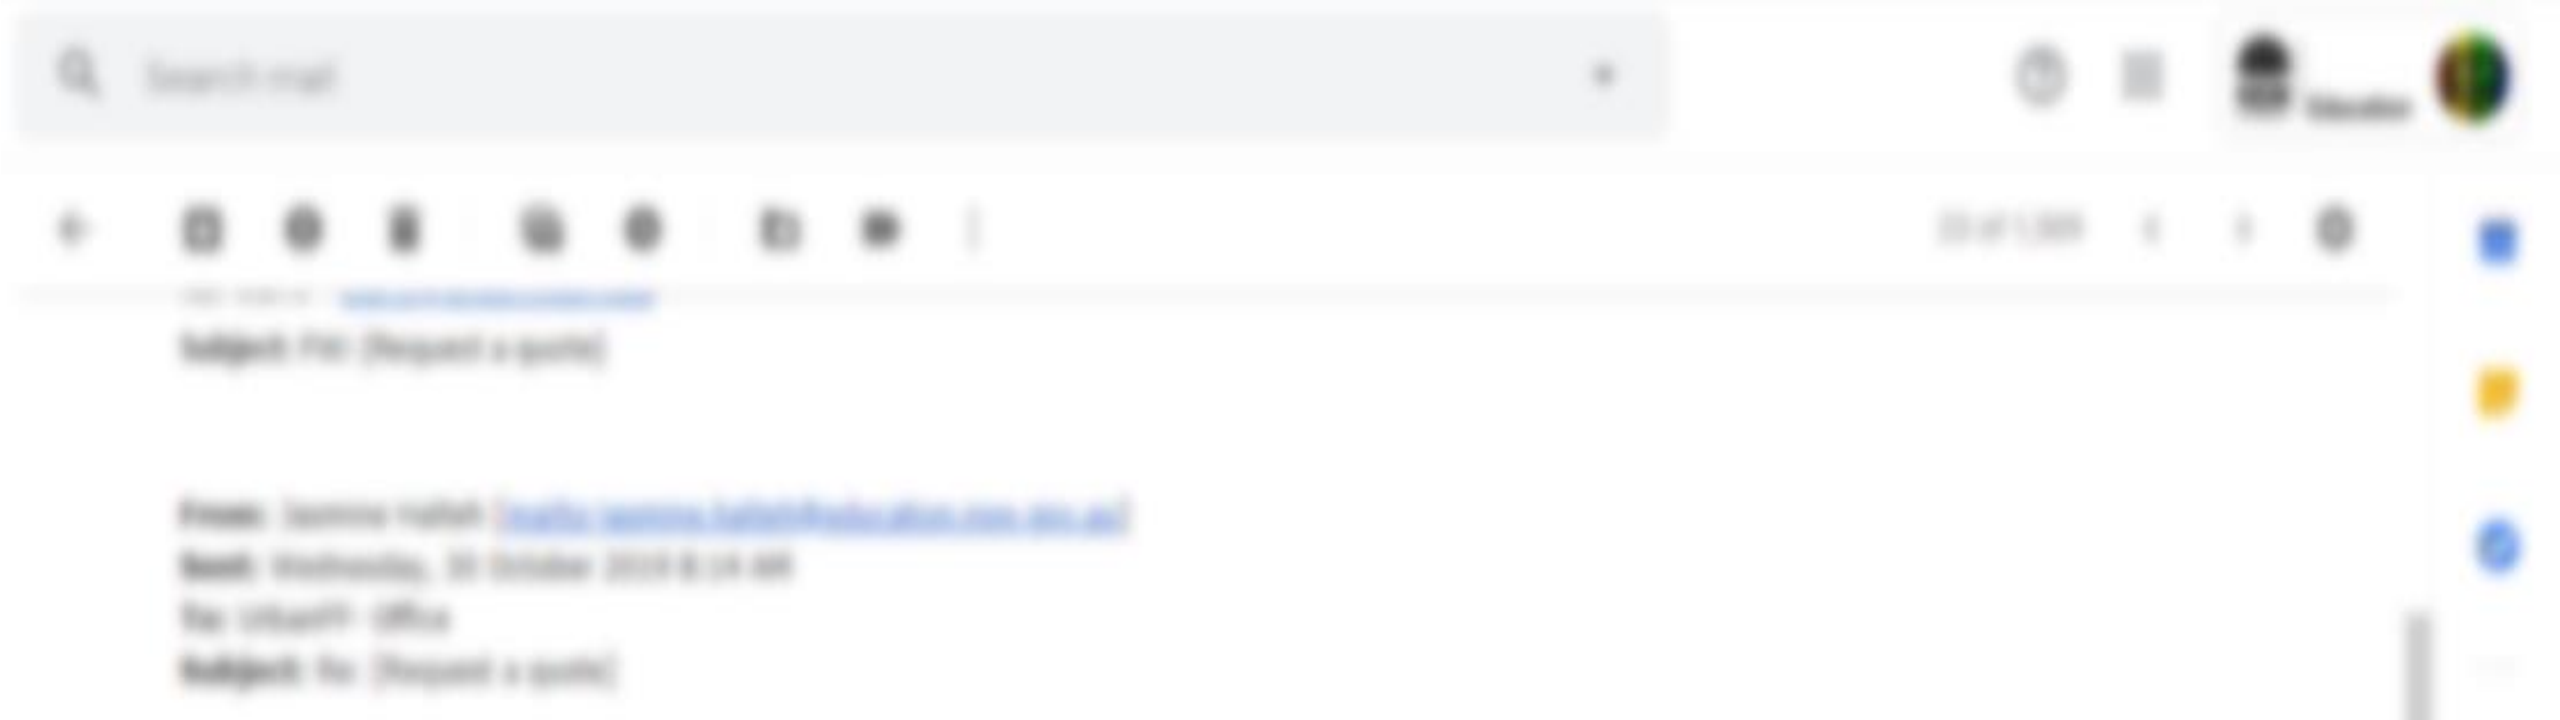

Optional logo/artwork

Optional catchment tray

When the water refill station arrive we will install them near the PDHPE bubblers.

Hi Allan,

I am a student from a healthy lifestyle program in Erskine Park High School, Western Sydney, NSW. We are planning to purchase one of your products for our school to improve the healthy lifestyle and clean environment for the students. Is there any chance I can get a quote for 2 of the BF200W Standard + Catchment Tray? By purchasing these two items, we'd want to use this as a test/trial period for our school. If the product is successful (to our liking), we are planning to purchase multiple in the future. Could we possibly get this at a reduced price?

Thanks for your consideration.

Kind regards,

James Hallett

Stage 2:

This plan was not only to raise money but to introduce healthier options for students.

To prepare these healthy meals and snacks all SALSA leaders participated in an all day incursion preparing the healthy meals for the following day.

BAY CLEANING DUTIES

BAY CLEANING DUTIES

The fruit store was a SUCCESS and we raised a total of \$403 and made a profit of \$150.

This fruit store was taken as a learning experience. To make more profit we concluded that purchasing in season fruits and bulk buying plastic items would decrease the total amount of money spent for the fruit store. This can allow us to raise more money.

Stage 3:

Since the Erskine Park SALSA representatives decided to purchase a water refill station we decided to create a water bottle to provide students with.

This can impact the environment by reducing the amount of plastic usage used throughout the school community, also allows students to stay hydrated throughout the day.

It will increase student water intake throughout the day, and reduce the amount of soft drinks purchased at the canteen.
