

TURF 2 U

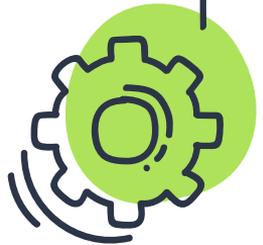

WE LOVE TURFIN!

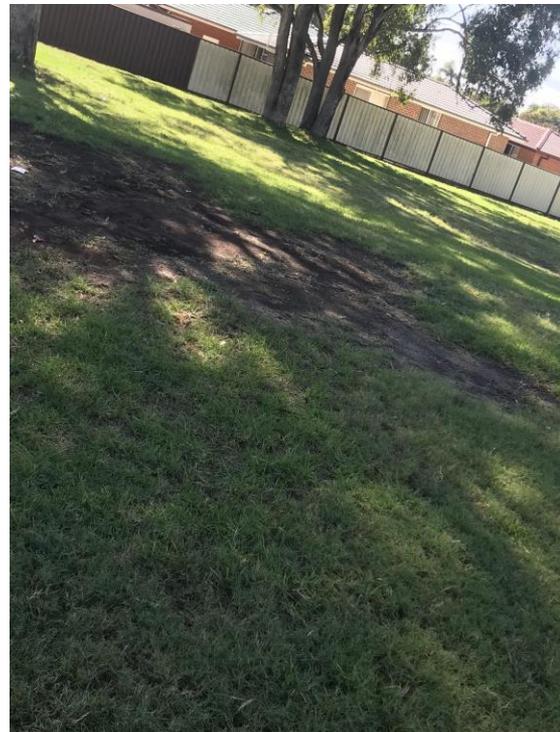

**Koralee Catlett, Alyse McCutcheon, Natalie Reeves,
Kalaya Ryan, Jayla Schofield**

PROBLEM - WHAT AND WHY?

- X Uneven surfaces
- X Cost
- X Maintenance
- X Weather
- X Water drainage

Dangerous Hazards

- X Drains
- X Ditches
- X Levelling of the ground

Uneven surfaces - cause injuries and decreases participation by students in sports.

Cost - money can be spent on other projects that will benefit the school

Maintenance - costly and time consuming

Water drainage and damage - prevents oval from being used, particularly during high-peak periods and sporting seasons

SOLUTION - WHAT DO WE WANT TO DO?

- X We would like to turf the ovals as they both display damage due to the changes in the weather and overall usage.
- X Safe year-round activity
- X We also want to improve the amount of overall youth participation in sports and outdoor activities.

SOLUTION - BENEFITS OF OUR SOLUTION

- X Make the school look more professional when other schools come to play sports against us.
- X The benefits of our solution is to increase the sports participation
- X Water Conservation - dramatic reduce in water use as you do not need to water it - eco and budget friendly.

SOLUTION - BENEFITS OF OUR SOLUTION

- X Prevents children from getting hurt while participating in sport, lessens the impact of an injury on grass than it does on dirt or ditches in the ground.

- X Durability - materials used for artificial turfing are extremely durable. Australian-made turf can last 10-20+ years.
